

KRACROM 26 / 33

Information Sheet

CHEMICAL AND PHYSICAL CHARACTERISTICS

Appearance	Powder of dark green colour
Density at the temp. of 20°C	0,92 kg/dm ³
Ttrivalent chromium compounds calculated as Cr ₂ O ₃ [% (m/m)]	26 ±1 %
Basicity	33 ±2 ° Sch
Solubility in water C [%min]	98
Iron compounds calculated as Fe (max)	100 mg/kg
Water insoluble parts (max)	0,2 %

CHARACTERISTICS

KRACROM 26 / 33 is a basic Chrome Sulphate with a high quality mineral tanning agent used in whole process of leather tanning.

KRACROM 26 / 33 is suitable for chrome tanning of skins of every kinds. Skins treated with KRACROM 26 / 33 feature a good compactness and a quite fine grain and is used 6 – 10% on pelt weight for pickled hide and skin.

PACKING

25 kgs bags on shrink wrapped pallets.

STORAGE

Powder should be stored in dry and ventilated places
