CHARACTERISTICS

Fatliquor product for all purpose leather

KRANOPOL FD is a Fatliquor agent very versatile, suitable in nobuck leather and furriery. It gives brightness and life to the colour, and the sense of fullness and roundness to the leather.

The touch is ductile and soft being able to mix all that characteristics in every concrete article depending on the concentrations or percentages added.

PERCENTAGES

- Leather-nobuck confection 15-20% approximately in dry weight.
- Leather-nobuck shoes Around 10% in dry weight.
